Program Description:

Chicago students will be able to earn a bachelor's degree in automotive technology through a "2+2 program" in which they complete an Associate of Applied Science (AAS) degree in automotive technology from Truman College or Kennedy-King College then transfer to Southern Illinois University's program. SIU faculty will teach upper-level automotive technical and automotive management courses at Truman.

The SIUC (Southern Illinois University Carbondale) baccalaureate program mixes upper-level automotive technology classes with business courses. Graduates have the option of working not only as technicians, but as sales and service managers or tool company representatives as well.

Eligibility:

Completion of the Associate in Applied Science

Application Information:

Register for Automotive courses at either Truman College or Kennedy King College

Helpful Resources:

Transfer Guides

Benefits

- Students can take upper level automotive courses towards their bachelors degree without leaving the city.
