#### NCCER

13614 Progress Blvd, Alachua, Florida 32615 Phone: (888) 622-3720 E-mail: info@nccer.org

## **CARPENTRY**

## **Competencies / Objectives**

## Fundamentals—Level One

#### **MODULE 27101-06 – ORIENTATION TO THE TRADE**

- 1. Describe the history of the carpentry trade.
- 2. Identify the aptitudes, behaviors, and skills needed to be a successful carpenter.
- 3. Identify the training opportunities within the carpentry trade.
- 4. Identify the career and entrepreneurial opportunities within the carpentry trade.
- 5. Identify the responsibilities of a person working in the construction industry.
- 6. State the personal characteristics of a professional.
- 7. Explain the importance of safety in the construction industry.

#### **MODULE 27102-06 – BUILDING MATERIALS, FASTENERS, AND ADHESIVES**

- 1. Identify various types of building materials and their uses.
- 2. State the uses of various types of hardwoods and softwoods.
- 3. Identify the different grades and markings of wood building materials.
- 4. Identify the safety precautions associated with building materials.
- 5. Describe the proper method of storing and handling building materials.
- 6. State the uses of various types of engineered lumber.
- 7. Calculate the quantities of lumber and wood products using industry-standard methods.
- 8. Describe the fasteners, anchors, and adhesives used in construction work and explain their uses.

#### **MODULE 27103-06 – HAND AND POWER TOOLS**

- 1. Identify the hand tools commonly used by carpenters and describe their uses.
- 2. Use hand tools in a safe and appropriate manner.
- 3. State the general safety rules for operating all power tools, regardless of type.
- 4. State the general rules for properly maintaining all power tools, regardless of type.
- 5. Identify the portable power tools commonly used by carpenters and describe their uses.
- 6. Use portable power tools in a safe and appropriate manner.

#### **MODULE 27104-06 - READING PLANS AND ELEVATIONS**

- 1. Describe the types of drawings usually included in a set of plans and list the information found on each type.
- 2. Identify the different types of lines used on construction drawings.
- 3. Identify selected architectural symbols commonly used to represent materials on plans.
- 4. Identify selected electrical, mechanical, and plumbing symbols commonly used on plans.
- 5. Identify selected abbreviations commonly used on plans.
- 6. Read and interpret plans, elevations, schedules, sections, and details contained in basic construction drawings.
- 7. State the purpose of written specifications.
- 8. Identify and describe the parts of a specification.
- 9. Demonstrate or describe how to perform a quantity takeoff for materials.

#### **MODULE 27105-06 - FLOOR SYSTEMS**

- 1. Identify the different types of framing systems.
- 2. Read and interpret drawings and specifications to determine floor system requirements.
- 3. Identify floor and sill framing and support members.
- 4. Name the methods used to fasten sills to the foundation.
- 5. Given specific floor load and span data, select the proper girder/beam size from a list of available girder/beams.
- 6. List and recognize different types of floor joists.
- 7. Given specific floor load and span data, select the proper joist size from a list of available joists.
- 8. List and recognize different types of bridging.
- 9. List and recognize different types of flooring materials.
- 10. Explain the purposes of subflooring and underlayment.
- 11. Match selected fasteners used in floor framing to their correct uses.
- 12. Estimate the amount of material needed to frame a floor assembly.
- 13. Demonstrate the ability to:
  - Lay out and construct a floor assembly
  - · Install bridging
  - Install joists for a cantilever floor
  - Install a subfloor using butt-joint plywood/OSB panels
  - Install a single floor system using tongue-and-groove plywood/OSB panels

#### **MODULE 27106-06 – WALL AND CEILING FRAMING**

- 1. Identify the components of a wall and ceiling layout.
- 2. Describe the procedure for laying out a wood frame wall, including plates, corner posts, door and window openings, partition Ts, bracing, and firestops.
- 3. Describe the correct procedure for assembling and erecting an exterior wall.
- 4. Identify the common materials and methods used for installing sheathing on walls.
- 5. Lay out, assemble, erect, and brace exterior walls for a frame building.
- 6. Describe wall framing techniques used in masonry construction.
- 7. Explain the use of metal studs in wall framing.
- 8. Describe the correct procedure for laying out ceiling joists.
- 9. Cut and install ceiling joists on a wood frame building.
- 10. Estimate the materials required to frame walls and ceilings.

#### **MODULE 27107-06 – ROOF FRAMING**

- 1. Understand the terms associated with roof framing.
- 2. Identify the roof framing members used in gable and hip roofs.
- 3. Identify the methods used to calculate the length of a rafter.
- 4. Identify the various types of trusses used in roof framing.
- 5. Use a rafter framing square, speed square, and calculator in laying out a roof.
- 6. Identify various types of sheathing used in roof construction.
- 7. Frame a gable roof with vent openings.
- 8. Frame a roof opening.
- 9. Erect a gable roof using trusses.
- 10. Estimate the materials used in framing and sheathing a roof.

## MODULE 27108-06 – INTRODUCTION TO CONCRETE, REINFORCING MATERIALS, AND FORMS

- 1. Identify the properties of cement.
- 2. Describe the composition of concrete.
- 3. Perform volume estimates for concrete quantity requirements.
- 4. Identify types of concrete reinforcement materials and describe their uses.
- 5. Identify various types of footings and explain their uses.
- 6. Identify the parts of various types of forms.
- 7. Explain the safety procedures associated with the construction and use of concrete forms.
- 8. Erect, plumb, and brace a simple concrete form with reinforcement.

#### **MODULE 27109-06 – WINDOWS AND EXTERIOR DOORS**

- 1. Identify various types of fixed, sliding, and swinging windows.
- 2. Identify the parts of a window installation.
- 3. State the requirements for a proper window installation.
- 4. Install a pre-hung window.
- 5. Identify the common types of exterior doors and explain how they are constructed.
- 6. Identify the parts of a door installation.
- 7. Identify the types of thresholds used with exterior doors.
- 8. Install a pre-hung exterior door.
- 9. Identify the various types of locksets used on exterior doors and explain how they are installed.
- 10. Install a lockset.

#### **MODULE 27110-06 – BASIC STAIR LAYOUT**

- 1. Identify the various types of stairs.
- 2. Identify the various parts of stairs.
- 3. Identify the materials used in the construction of stairs.
- 4. Interpret construction drawings of stairs.
- 5. Calculate the total rise, number and size of risers, and number and size of treads required for a stairway.
- 6. Lay out and cut stringers, risers, and treads.
- 7. Build a small stair unit with a temporary handrail.

## Level Two—Framing and Finishing

#### **MODULE 27201-07 – COMMERCIAL DRAWINGS**

- 1. Recognize the difference between commercial and residential construction drawings.
- 2. Identify the basic keys, abbreviations, and other references contained in a set of commercial drawings.
- 3. Accurately read a set of commercial drawings.
- 4. Identify and document specific items from a door and window schedule.
- 5. Explain basic construction details and concepts employed in commercial construction.
- 6. Calculate the floor area of each room in a floor plan.

#### **MODULE 27202-07 - ROOFING APPLICATIONS**

- 1. Identify the materials and methods used in roofing.
- 2. Explain the safety requirements for roof jobs.
- 3. Install fiberglass shingles on gable and hip roofs.
- 4. Close up a valley using fiberglass shingles.
- 5. Explain how to make various roof projections watertight when using fiberglass shingles.
- 6. Complete the proper cuts and install the main and hip ridge caps using fiberglass shingles.
- 7. Lay out, cut, and install a cricket or saddle.
- 8. Install wood shingles and shakes on roofs.
- 9. Describe how to close up a valley using wood shingles and shakes.
- 10. Explain how to make roof projections watertight when using wood shakes and shingles.
- 11. Complete the cuts and install the main and hip ridge caps using wood shakes/shingles.
- 12. Demonstrate the techniques for installing other selected types of roofing materials.

#### **MODULE 27203-07 – THERMAL AND MOISTURE PROTECTION**

- 1. Describe the requirements for insulation.
- 2. Describe the characteristics of various types of insulation material.
- 3. Calculate the required amounts of insulation for a structure.
- 4. Install selected insulation materials.
- 5. Describe the requirements for moisture control and ventilation.
- 6. Install selected vapor barriers.
- 7. Describe various methods of waterproofing.
- 8. Describe air infiltration control requirements.
- 9. Install selected building wraps.

#### **MODULE 27204-07 – EXTERIOR FINISHING**

- 1. Describe the purpose of wall insulation and flashing.
- 2. Install selected common cornices.
- 3. Demonstrate lap and panel siding estimating methods.
- 4. Describe the types and applications of common wood siding.
- 5. Describe fiber-cement siding and its uses.
- 6. Describe the types and styles of vinyl and metal siding.
- 7. Describe the types and applications of stucco and masonry veneer finishes.
- 8. Describe the types and applications of special exterior finish systems.
- 9. Install three types of siding commonly used in your area.

#### **MODULE 27205-07 – COLD-FORMED STEEL FRAMING**

- 1. Identify the components of a steel framing system.
- 2. Identify and select the tools and fasteners used in a steel framing system.
- 3. Identify applications for steel framing systems.
- 4. Demonstrate the ability to build back-to-back, box, and L-headers.
- 5. Lay out and install a steel stud structural wall with openings to include bracing and blocking.
- 6. Lay out and install a steel stud non-structural wall with openings to include blocking and bracing.

#### **MODULE 27206-07 – DRYWALL INSTALLATION**

- 1. Identify the different types of drywall and their uses.
- 2. Select the type and thickness of drywall required for specific installations.
- 3. Select fasteners for drywall installation.
- 4. Explain the fastener schedules for different types of drywall installations.
- 5. Perform single-layer and multi-layer drywall installations using different types of fastening systems, including:
  - Nails
  - Drywall screws
  - Adhesives
- 6. Install gypsum drywall on steel studs.
- 7. Explain how soundproofing is achieved in drywall installations.
- 8. Estimate material quantities for a drywall installation.

#### **MODULE 27207-07 - DRYWALL FINISHING**

- 1. State the differences between the six levels of finish established by industry standards and distinguish a finish level by observation.
- 2. Identify the hand tools used in drywall finishing and demonstrate the ability to use these tools.
- 3. Identify the automatic tools used in drywall finishing.
- 4. Identify the materials used in drywall finishing and state the purpose and use of each type of material, including:
  - Compounds
  - Joint reinforcing tapes
  - Trim material
  - Textures and coatings
- 5. Properly finish drywall using hand tools.
- 6. Recognize various types of problems that occur in drywall finishes; identify the causes and correct methods for solving each type of problem.
- 7. Patch damaged drywall.

#### **MODULE 27208-07 – DOORS AND DOOR HARDWARE**

- 1. Identify various types of door jambs and frames and demonstrate the installation procedures for placing selected door jambs and frames in different types of interior partitions.
- 2. Identify different types of interior doors.
- 3. Identify different types of interior door hardware and demonstrate the installation procedures for selected types.
- 4. Demonstrate the correct and safe use of the hand and power tools described in this module.
- 5. List and identify specific items included on a typical door schedule.
- 6. Demonstrate the procedure for placing and hanging a selected door.

#### **MODULE 27209-07 – SUSPENDED CEILINGS**

- 1. Establish a level line.
- 2. Explain the common terms related to sound waves and acoustical ceiling materials.
- 3. Identify the different types of suspended ceilings.
- 4. Interpret plans related to ceiling layout.
- 5. Sketch the ceiling layout for a basic suspended ceiling.
- 6. Perform a material takeoff for a suspended ceiling.
- 7. Install selected suspended ceilings.

#### **MODULE 27210-07 – WINDOW, DOOR, FLOOR, AND CEILING TRIM**

- 1. Identify the different types of standard moldings and describe their uses.
- 2. Make square and miter cuts using a miter box or power miter saw.
- 3. Make coped joint cuts using a coping saw.
- 4. Select and properly use fasteners to install trim.
- 5. Install interior trim, including:
  - Door trim
  - Window trim
  - Base trim
  - Ceiling trim
- 6. Estimate the quantities of different trim materials required for selected rooms.

#### **MODULE 27211-07 - CABINET INSTALLATION**

- 1. State the classes and sizes of typical base and wall kitchen cabinets.
- 2. Identify the cabinet components and hardware and describe their purposes.
- 3. Lay out factory-made cabinets, countertops, and backsplashes.
- 4. Explain the installation of an island base.

#### MODULE 27212-07 – CABINET FABRICATION

- 1. Recognize the common types of woods used to make cabinets.
- 2. Correctly and safely use stationary power tools.
- 3. Identify and cut the various types of joints used in cabinetmaking.
- 4. Build a cabinet from a set of drawings.
- 5. Install plastic laminate on a countertop core.

## Level Three—Forms

#### **MODULE 27301-07 - RIGGING EQUIPMENT**

- 1. Perform a safety inspection on hooks, slings, and other rigging equipment.
- 2. Select, inspect, use, and maintain special rigging equipment including:
  - Block and tackle
  - Chain hoists
  - Come-alongs
  - Jacks
  - Tuggers
- 3. Tie knots used in rigging.

#### **MODULE 27302-07 - RIGGING PRACTICES**

- 1. Determine the weight load.
- 2. Interpret a load chart.
- 3. Determine the center of gravity of a load.
- 4. Properly attach rigging hardware for routine lifts.
- 5. Use and interpret hand signals.
- 6. Perform sling tension calculations.
- 7. Identify requirements for an engineered lift.

#### **MODULE 27303-07 – PROPERTIES OF CONCRETE**

- 1. Identify various types of cement and describe their uses.
- 2. Identify types and sizes of concrete aggregates.
- 3. Identify types of concrete admixtures and describe thier uses.
- 4. Identify special types of concrete and describe their uses.
- 5. Calculate concrete volume requirements for rectangular, cylindrical, or other geometric structures using formulas, concrete tables, and/or concrete calculators, as applicable.
- 6. Identify concrete curing methods and materials.
- 7. Identify concrete testing methods.
- 8. Mix concrete using different aggregates and admixtures.
- 9. Sample concrete using a test cylinder.
- 10. Perform slump testing of concrete.
- 11. Demonstrate how to properly set up a curing box.

#### **MODULE 27304-07 – REINFORCING CONCRETE**

- 1. Describe the applications of reinforcing bars, the uses of reinforced structural concrete, and the basic processes involved in placing reinforcing bars.
- 2. Recognize amd identify the bar bends standardized by the American Concrete Institution (ACI).
- 3. Read and interpret bar lists and describe the information found on a bar list.
- 4. List the types of ties used in securing reinforcing bars.
- 5. State the tolerances allowed in the fabrication of reinforcing bars.
- 6. Demonstrate the proper use of common ties for reinforcing bars.
- 7. Describe methods by which reinforcing bars may be cut and bent in the field.
- 8. Use the tools and equipment needed for installing reinforcing bars.
- 9. Safely use selected tools and equipment to cut, bend, and install reinforcing materials.
- 10. Explain the necessity of concrete cover in placing reinforcing bars.
- 11. Explain and demonstrate how to place bars in walls, columns, beams, girders, joists, and slabs.
- 12. Idenitfy lapped splices.

#### **MODULE 27305-07 - HANDLING AND PLACING CONCRETE**

- 1. Recognize the various equipment used to transport and place concrete.
- 2. Describe the factors that contribute to the quality of concrete placement.
- 3. Demonstrate the correct methods for placing and consolidating concrete into forms.
- 4. Demonstrate how to use a screed to strike off and level concrete to the proper grade in a form.
- 5. Demonstrate how to use tools for placing, floating, and finishing concrete.
- 6. Determine when conditions permit the concrete finishing operation to start.
- 7. Name the factors that affect the curing of concrete and describe the methods used to achieve proper curing.
- 8. Properly care for and safely use hand and power tools used when working with concrete.

#### **MODULE 27306-07 – TRENCHING AND EXCAVATING**

- 1. Identify the different types, bearing capacities, and classifications of soils.
- 2. Identify ways to increase soil density.
- 3. State the purpose of soil density (compaction) tests.
- 4. Explain the safety considerations for trenches and deep excavations.
- 5. Identify and describe groundwater mitigation methods.
- 6. Identify and describe rock mitigation techniques.

#### **MODULE 27307-07 – FOUNDATIONS AND SLAB-ON-GRADE**

- 1. Establish elevations.
- 2. Identify various types of footing and foundations.
- 3. Select the appropriate footing for a foundation.
- 4. Lay out and construct a selected footing and foundation using an established gridline.
- 5. Install templates, keyways, and embedments.
- 6. Form and strip pier foundation forms and prepare for resetting at another location.
- 7. Identify the different classes of slabs-on-grade.
- 8. Identify edge forms and explain their purpose.
- 9. Construct and disassemble edge forms.
- 10. Install vapor barrier, reinforcement, and control joints.
- 11. Establish finish grade and fill requirements.

#### **MODULE 27308-07 – VERTICAL FORMWORK**

- 1. Explain safety procedures associated with using concrete wall forms.
- 2. Identify the various types of concrete wall forms.
- 3. Identify the components of each type of vertical forming system.
- 4. Erect, plumb, and brace a selected wall.
- 5. Recognize various types of manufactured forms.
- 6. State the differences in construction and use among different types of forms.
- 7. Erect, plumb, and brace a column form.
- 8. Erect, plumb, and brace a stair form.
- 9. Locate and install bulkheads and embedded forms.

#### **MODULE 27309-07 – HORIZONTAL FORMWORK**

- 1. Identify the safety hazards associated with elevated deck formwork and explain how to eliminate them.
- 2. Identify the different types of elevated decks.
- 3. Identify the different types of flying form systems.
- 4. Identify different types of handset form systems.
- 5. Erect, plumb, brace, and level different types of handset deck form systems.
- 6. Install edsge forms, blockouts, embedments, and construction joints.
- 7. Identify typical bridge and culvert form systems.

#### **MODULE 27310-07 – TILT-UP WALL PANELS**

- 1. Describe the different processes used in installing tilt-up wall panels.
- 2. Explain the importance of the casting bed.
- 3. Identify and install the various types of lifting eyes used in forming tilt-up panels.
- 4. Identify the special rigging requirements for tilt-up wall panels.
- 5. Identify the different methods of forming tilt-up wall panels.
- 6. Demonstrate the different methods of forming tilt-up wall panels.
- 7. Prepare for the erection of tilt-up wall panels.
- 8. Install proper bracing for tilt-up wall panels.
- 9. Erect and properly align tilt-up wall panels.
- 10. Install embedments, blockouts, architectural finishes, lifting devices, and reinforcing materials using a set of construction drawings.
- 11. Describe the final grouting procedure.

### **Level Four**

#### **MODULE 27401-08 – SITE LAYOUT I: DISTANCE MEASUREMENT AND LEVELING**

- 1. Describe the major responsibilities of the carpenter relative to site layout.
- 2. Convert measurements stated in feet and inches to equivalent measurements stated in decimal feet, and vice versa.
- 3. Use and properly maintain tools and equipment associated with taping.
- 4. Use manual or electronic equipment and procedures to make distant measurements and perform site layout tasks.
- 5. Determine approximate distances by pacing.
- 6. Recognize, use, and properly care for tools and equipment associated with differential leveling.
- 7. Use a builder's level and differential leveling procedures to determine site and building elevations.
- 8. Record site layout data and information in field notes using accepted practices.
- 9. Check and/or establish 90-degree angles using the 3-4-5 rule.

# MODULE 27402-08 – SITE LAYOUT II: ANGULAR MEASUREMENT ANNOTATED INSTRICUCTOR'S GUIDE

- 1. Perform calculations pertaining to angular measurements:
  - Use the Pythagorean theorem to determine unknown values.
  - Use right triangle trigonometry to determine unknown values.
  - Convert feet and inches to decimal feet, and vice versa.
  - Convert angular measurements stated in decimal degrees to degrees, minutes, seconds, and vice versa.
  - Convert azimuth to bearing, and vice versa.
  - Convert polar coordinates to rectangular coordinates, and vice versa.
  - Convert distance and direction into latitudes and departures.
- 2. Recognize, safely use, and properly care for site layout tools and instruments.
- 3. Describe the use of GPS devices for construction projects.
- 4. Lay out building lines using traditional and radial layout techniques.
- 5. Use trigonometric leveling techniques to determine unknown elevations.

#### **MODULE 27403-08 - ADVANCED ROOF SYSTEMS**

- 1. Describe the characteristics and properties of metals as they relate to roofing applications.
- 2. Identify the types of trusses and joists used in commercial roofing.
- 3. Demonstrate the installation of panels for a lap seam metal roof, including the preparation of eaves.
- 4. Demonstrate the installation of panels for a standing seam metal roof.
- 5. Describe the proper installation procedures for a built-up roof.
- 6. Demonstrate the installation of endlapped panels for a standing seam metal roof.
- 7. Demonstrate the sealing of a sidelap standing seam metal roof.

#### **MODULE 27404-08 – ADVANCED WALL SYSTEMS**

- 1. Explain the different types of wall systems.
- 2. Explain the different types of wall finishes.
- 3. Explain the various methods of fireproofing a wall system.
- 4. Demonstrate the ability to install paneling with wainscoting.
- 5. Describe the process used in forming and installing tilt-up wall panels.
- 6. Identify various advanced wall systems and explain the techniques used in their construction.
- 7. Demonstrate the ability to build penetration firewalls and sound control walls per specifications.

#### **MODULE 27405-08 – ADVANCED STAIR SYSTEMS**

- 1. Identify the various stair parts.
- 2. Explain and demonstrate the procedure for cutting and installing various stair parts, including:
  - Mitered finish stringers
  - Mitered risers
  - Treads
  - Newel posts
  - Handrails
  - Balusters
- 3. Describe the method for finishing service stairs and main stairs, and demonstrate instructor selected finishing for one or more of the following:
  - Open
  - Closed
  - Combination open/closed
  - L-shaped
  - U-shaped
- 4. Identify what materials can be used to build stairs for commercial construction.

#### MODULE 27406-08 – INTRODUCTION TO LIGHT EQUIPMENT

- 1. Identify and explain the operation and use of various pieces of light equipment, including:
  - Aerial lifts
  - Skid steer loaders
  - Trenchers
  - Generators
  - Compressors
  - Compactors
  - Forklifts
  - Backhoe
- 2. State the safety precautions associated with light equipment.
- 3. Operate selected items of light equipment.

#### **MODULE 27407-08 – WELDING**

- 1. Identify and explain the parts of an oxyfuel cutting outfit.
- 2. State the safety rules for working with oxyfuel and welding equipment.
- 3. Identify the proper protective clothing and eye protection to be used in oxyfuel cutting and welding.
- 4. Explain the meaning of the terms backfire and flashback, describe how to avoid them, and what to do if they occur.
- 5. Match cutting torch tips to their applications.
- 6. Under the supervision of the instructor, demonstrate the ability to:
  - Set up equipment for oxyfuel cutting.
  - Turn on, light, and adjust the equipment to obtain a neutral flame.
  - Cut mild steel, stop, and restart the cut.
- 7. Identify the types of arc welding machines.
- 8. Identify the types of arc welding electrodes.
- 9. Interpret the meanings of the electrode classification codes.
- 10. Identify the factors to consider when selecting electrodes.
- 11. State the characteristics of a good weld.
- 12. Under the supervision of the instructor, demonstrate the ability to perform a basic welding procedure.

#### **MODULE 27408-08 – COMMERCIAL FINISH WORK**

- 1. Identify materials and methods used to finish the interior of commercial buildings.
- 2. Identify materials and methods used to finish the exterior of commercial buildings.

#### **MODULE 27409-08 - SITE PREPARATION**

- 1. Discuss reasons for stormwater protection and erosion and sedimentation control.
- 2. Name ways to prevent erosion and sedimentation.
- 3. List items that need to be addressed in the site utilization plan.
- 4. State methods for ensuring that crane work is performed safely.
- 5. Identify methods used to mitigate water problems at a work site.

# MODULE 27410-08 – (MT101) INTRODUCTORY SKILLS FOR THE CREW LEADER CHAPTER ONE – ORIENTATION TO THE JOB

- 1. Discuss the history, trends, and economic conditions of the construction industry.
- 2. Describe how workers' values have changed over the years.
- 3. Explain the importance of training for construction industry personnel.
- 4. List the new technologies available, and discuss how they are helpful to the construction industry.
- 5. Identify the gender and minority issues associated with a changing workforce.
- 6. Describe what employers can do to prevent workplace discrimination.
- 7. Describe the four major categories of construction projects.
- 8. Differentiate between formal and informal organizations.
- 9. Describe the difference between authority and responsibility.
- 10. Explain the purpose of job descriptions and what they should include.
- 11. Distinguish between company policies and procedures.

#### CHAPTER TWO - LEADERSHIP SKILLS

- 1. Explain the role of a crew leader.
- 2. List the characteristics of effective leaders.
- 3. Be able to discuss the importance of ethics in a supervisor's role.
- 4. Identify the three styles of leadership.
- 5. Describe the forms of communication.
- 6. Explain the four parts of verbal communication.
- 7. Demonstrate the importance of active listening.
- 8. Illustrate how to overcome the barriers to communication.
- 9. List some ways that supervisors can motivate their employees.
- 10. Explain the importance of delegating and implementing policies and procedures.
- 11. Differentiate between problem solving and decision making.

#### **CHAPTER THREE - SAFETY**

- 1. Demonstrate an understanding of the importance of safety.
- 2. Give examples of direct and indirect costs of workplace accidents.
- 3. Identify safety hazards of the construction industry.
- 4. Explain the purpose of the Occupational Safety and Health Act (OSHA).
- 5. Discuss OSHA inspection programs.
- 6. Identify the key points of a safety program.
- 7. List the steps to train employees on how to perform new tasks safely.
- 8. Identify a supervisor's safety responsibilities.
- 9. Explain the importance of having employees trained in first aid and Cardio-Pulmonary Resuscitation (CPR) on the job site.
- 10. Describe the signals of substance abuse.
- 11. List the essential parts of an accident investigation.
- 12. Describe the ways to maintain employee interest in safety.

#### CHAPTER FOUR – PROJECT CONTROL

- 1. Describe the three phases of a construction project.
- 2. Define the three types of project delivery systems.
- 3. Define planning and describe what it involves.
- 4. Explain why it is important to plan.
- 5. Describe the two major stages of planning.
- 6. Explain the importance of documenting one's work.
- 7. Describe the estimating process.
- 8. Explain how schedules are developed and used.
- 9. Identify the two most common schedules.
- 10. Explain short-interval production scheduling (SIPS).
- 11. Describe the different costs associated with building a job.
- 12. Explain the supervisor's role in controlling costs.
- 13. Illustrate how to control the main resources of a job: materials, tools, equipment, and labor.
- 14. Define the terms production and productivity and explain why they are important.

## **Level Five**

## **MODULE 27501-07 - CABINETMAKING**

- 1. Recognize the common types of woods used to make cabinets.
- 2. Correctly and safely use stationary power tools.
- 3. Identify and cut the various types of joints used in cabinetmaking.
- 4. Build a cabinet from a set of drawings.
- 5. Install plastic laminate on a countertop core.
